PATUCK-GALA COLLEGE OF COMMERCE

GREEN CAMPUS POLICY

The Green Campus Policy of our Institute states the promotion of green practices in the campus. This is exhibited in our commitment to sustainability and environment management in conducting our activities and operations.

The green campus policy contains the following elements:

- To manage all waste within the campus including organic waste, recyclables, medical waste and e-waste and strive to be a net zero waste campus.
- To increase campus tree cover and biodiversity.
- To inculcate environment-friendly behaviour among students and College fraternity through educational programs, visual communication modes and active participation.
- To employ latest and appropriate technology to aid in green practices.
- To reduce carbon footprint and pollution of transportation to the campus through use of buses, public transport, walking, bicycling and e-vehicles.
- To engage with the government, municipal corporation, and the affiliating University to actively work in the areas of green practices.
- To engage the students, staff and community in promoting efforts for green campus and elsewhere through research and community-based projects.
- To monitor and respond to emerging issues relating to green practices and strive to be resilient and future ready.

Our Institute adopts “Go Green” approach and integrates green practices into decision-making:

- Storing documents electronically
- Printing only when required and take double side printing
- Using reverse side of the unused old documents for drafts
- Printing documents in black and white or grayscale whenever possible
- Purchasing energy star efficient office equipments
